PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer

11/2022 – 07/2025

Velox Labs Pvt. Ltd. — Full-Time, 40 hrs/wk

Kathmandu, Nepal

- Built Hajir Software (HRMS) dashboard, adopted by 500+ client companies.
- Developed biometric integration system and custom NPM package, enhancing functionality.
- Designed Go-based internal tool, improving monitoring efficiency by 20%.

Lead Software Developer

01/2024 – 02/2025

Technergy Global Pvt. Ltd. — Part-Time, 24 hrs/wk

Kathmandu, Nepal

- Architected 3+ client platforms, ensuring 100% on-time delivery.
- Optimized CI/CD pipelines with Docker, reducing deployment time by 40%.
- Mentored 5 developers, improving team productivity by 15%.

PROJECTS

Hajir Software (Human Resource Management System)

- Architected frontend with Next.js, leading a team to develop attendance, shift management, and advanced reporting modules for 500+ clients.
- Drove company growth by scaling HRMS from scratch, ensuring code quality and production deployments, enhancing operational efficiency.

Biometric Integration System (Hajir)

- Developed solo Electron-based system with integrated frontend and backend, creating a custom JavaScript NPM package.
- Enabled Velox Labs to acquire new clients, driving significant company growth.

Laliguras (Multi-Vendor E-commerce)

- Architected and developed full-stack system with WebSockets and FCM, supporting 100+ vendors, deployed via Dockerized CI/CD pipeline.
- Led a team of developers to implement real-time pickup and delivery features, driving platform scalability and user engagement.

Studio Management System

- Built and deployed full-stack system with Next.js, Express, and Dockerized CI/CD pipeline.
- Developed rich UI with map integration and automated email workflows, driving company growth through enhanced client satisfaction for an Australian client.
